About me :

My passion for architecture and research defines me;I love playing with conceptual idea and the form it takes me to. Research relating to settlements, their growth, the paradigm they follow are my favourite genre. And i love reading opinions about this.
For me Architecture and Planning are the keys to solve problemso of now and future.

AZAM RASHID

Architect(GCA) | Ekistician(JMI)

It's for the curiousity, the cat has nine lives.
